

Why diverse leaders are essential for the energy industry

Improving performance

50%

higher profitability where women make up at least 15% of senior managers compared to less than 10%¹

21%

above-average more likely to achieve above-average profitability if companies are in the top quartile for diversity on their executive teams²

3.1%

excess annual returns 3.1% excess annual returns in companies with at least one female director compared to an all-male board³

66%

Higher return on capital: 66% For companies with the most women on a board compared to the least⁴

Better Decision Making

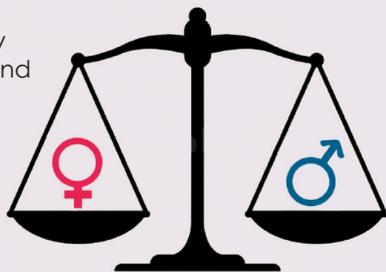

Different perspectives and experiences prevent 'group think' and bring new thinking⁵, essential for the energy transition. Companies with above average diversity on their management teams report 19% higher innovation revenue.⁶

Achieving better corporate governance and ethics

Women's board representation is positively associated with CSR and Social Reputation⁷.

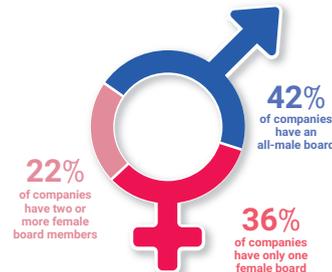

Just one female on the board cuts the risk of going bust by 20%⁸

What are the numbers telling us?

Progress on gender diversity in the UK energy sector is slow. As at Q1 2019, women still occupy only 16% of board seats and 6% of executive board seats; and 42% of the top energy companies have no women on their board at all.⁹
